Project Profile

Architect: Jon Graves Architects
Tacoma, Washington

Contractor: Mattison Martinoli
Monroe, Washington

The Project

Renovation of the TwinStar administration building lobby, including the main stairway and lobby walls, as well as the columns. Inpro won the wall panel material bid when it was determined a large, global ceiling and wall company could not meet the installation target date set for the project.

Inpro® Products Used

Palladium® Square Edge Wall Panels in Chatsworth Oak, with clear anodized aluminum trim. Installation was in the lobby and stairwell spaces on the first and second floor. The column wraps reached a height of over 30 feet.
