

Installation Instructions

700/700W/G2-700 WALL GUARD

Please read all instructions before installing wallguard.

Important

1. Acclimate materials 24 hrs before installation. Maintain temperature controlled environment after installation
2. Install in accordance with manufacturer's installation instructions. Failure to do so will void the warranty.

Installation tips

1. Cut covers up to 1/16" (1.6mm) longer to ensure a tight fit.
2. Lubricate blades when cutting aluminum to reduce burrs.

Installation Instructions

700/700W/G2-700 WALL GUARD

Please read all instructions before installing wallguard.

FIG. 1

1. Cut aluminum retainer to desired length, leaving allowance for returns, outside corners and inside corners. See Figure 1.

FIG. 2

2. Drill holes in retainer using 1/4" [6mm] drill bit in a zigzag pattern. Position retainer on wall allowing for end caps/corners. Level and mark holes. See Fig. 2.

NOTE: For concrete or brick wall installation, drill 1/4" [6mm] holes, 3/8" [10mm] from each end of retainer for end caps/corners.

NOTE: If using brackets or rubber spaces, use bracket or spacer as a template to mark holes when drilling retainer. See Figures 2a & 2b.

FIG. 2a

Installation Instructions

700/700W/G2-700 WALL GUARD

Please read all instructions before installing wallguard.

FIG. 3

3. Drill marked holes on wall using a 1/4" [6mm] drill bit and position Alligator anchors into holes. Mount retainer on wall and tighten screws to secure. Slide end caps and corners onto the retainer and secure, leaving a 1/16" [1.5mm] gap between returns/corners and retainer to allow for adjustment. See Figure 3.

With lengths over 12' [3.65M], a splice support is recommended between butt joints for added support. See Figure 3a.

NOTE: For concrete or brick wall installation, use #10 x 1 3/4" Phillips pan head screws to secure end caps and corners.

FIG. 3a

NOTE: If rubber spacers are used, attach them behind the retainer at all mounting hole locations, including those for end caps and corners.

NOTE: If brackets are used, use a 3/4" drill bit for toggle wings or a 1/2" drill bit for lead anchors to drill the marked holes on the wall. Attach end caps and corners with 5/8" hex bolt assembly inserted from the back.

FIG. 4

4. Cut the impact bumper to the length between the inside edge of the end caps/corners/splices. Position and snap bumper in place. Cut the cover to length between end caps and/or corners. (Note: trim factory edges square before installation). Position cover on retainer and adjust returns and/or corners for a tight fit. Push cover over the retainer until it snaps into place. See Figure 4.
